PROFILE

As a dedicated Full-Stack Software Developer, I specialize in building modern, efficient, and scalable web and mobile applications. My expertise spans both front-end and back-end development, enabling me to craft user-centric solutions that address real-world challenges while exceeding expectations.

WORK EXPERIENCE

SENIOR MANAGER / SENIOR FULL-STACK WEB AND MOBILE APP DEVELOPER
I-Remit Inc.
Oct 2018 - Present

- Supervised and managed multiple software development projects, ensuring timely delivery and quality outcomes.
- Led the end-to-end development of remittance applications for web and mobile platforms.
- Selected and implemented appropriate development tools to streamline project execution.
- Designed and optimized database structures to support application performance and scalability.
- Mentored and trained new developers to improve team productivity and technical proficiency.
- Developed and maintained Web APIs, including SOAP and RESTful APIs, to integrate with external systems.
- Created and implemented webhook APIs for real-time event-driven communication.
- Built internal business applications, such as an accounting tool, to enhance operational efficiency.
- Developed cross-platform mobile applications for Android and iOS.
- Deployed and maintained mobile applications on Google Play and the App Store.
- Published production-ready APIs, ensuring scalability, security, and reliability.
- Consistently completed projects within established timeframes, meeting client and business expectations.

WORK EXPERIENCE

JUNIOR SYSTEM WEB DEVELOPER

Optimum Exchange Remit Inc.

Sep 2015 - Oct 2018

- Maintained internal remittance applications using VBA (MS Access) to ensure smooth operations.
- Developed and implemented new system requirements for enhanced functionality.
- Diagnosed and resolved internet and network issues promptly.
- Administered desktop and laptop maintenance, including updates to antivirus software and Microsoft Office.
- Selected, procured, and set up a Windows Server 2016 for internal systems.
- Designed and developed an SMS application for automated text notifications to beneficiaries.
- Created promotional materials, such as posters, for international remittance campaigns.
- Developed a web application integrated with APIs from domestic banks and pawnshops to enable real-time remittance transactions.
- Managed regular database backups and ensured data integrity.
- Maintained and updated existing web applications for optimal performance.
- Generated and reconciled end-of-day reports to support financial operations.

JUNIOR WEB DEVELOPER / GAME DEVELOPER / SUPERVISOR

The Harish & Johnsen Group

Aug 2013 - Jul 2015

- Supervised and managed multiple projects, ensuring timely delivery and adherence to quality standards.
- Designed and developed games and mobile applications for Android and iOS platforms using Unity and Xcode.
- Built and maintained web systems and applications using PHP frameworks, WordPress, and other CMS platforms.
